| <b>Frontend</b>           | JavaScript, TypeScript, React, Next.js, React Native, HTML5, CSS3, responsive UI |
| <b>Backend &amp; Data</b> | Node.js, Express.js, REST API integration, MySQL, PostgreSQL, MongoDB            |
| <b>Tools &amp; Cloud</b>  | Git, Google Cloud, cross-functional collaboration                                |

### PROFESSIONAL EXPERIENCE

#### React.js Frontend Developer · Betproduct

May 2026–Present

- Build production-ready frontends for slot games using React.js, delivering responsive and maintainable gameplay interfaces for B2B casino distribution.
- Own the iframe integration from the frontend side, enabling casino operators to embed games reliably within their platforms.
- Implement host-game communication and balance-control flows, coordinating game state, player sessions and balance updates between embedded slots and casino systems.

#### Next.js Frontend Developer (Freelance) · Lockz

Jun 2024–Mar 2026

- Built and maintained the frontend of a fantasy-sports gaming platform using Next.js and TypeScript in collaboration with a PHP backend team.
- Developed a B2B iframe integration that enabled partner casino platforms to embed Lockz games while the host platform retains control of authentication and wallet management.
- Translated product and integration requirements into reusable UI components, responsive layouts and stable frontend flows.

#### React Frontend Developer · Citadeli

Nov 2021–Nov 2022

- Built and maintained the frontend of an internal financial-management application with spreadsheet-style workflows for company-wide finance operations.
- Integrated backend APIs with the PHP team and improved application performance, responsiveness and consistency across devices.
- Refined UI/UX for complex financial data entry and management, making internal workflows clearer and easier to use.

#### Full-Stack Web Developer · Exceed Team / Websmart

May 2019–May 2020

- Progressed from intern to Junior Developer while building full-stack web applications with the MERN stack.
- Developed React interfaces, Node.js/Express APIs and MongoDB-backed features using component-based architecture and state management.
- Contributed across the delivery lifecycle, from feature implementation and API integration to debugging and maintenance.

**Content Manager, Journalist & Website Administrator · Cardplayer / Adjarabet** Dec 2015–Aug 2019

- Managed content for an online poker publication; wrote articles, conducted interviews and covered major local and international poker events.
- Maintained website content and publishing quality in a fast-moving digital environment.

## SELECTED PROJECTS

### Goldshop.ge

Designed and built a full-stack e-commerce website using React, Node.js, Express and MongoDB without a pre-existing UI/UX design.

### Lockz.com

Built the Next.js and TypeScript frontend in collaboration with a PHP backend team.

### Lingwing.com

Rebuilt the frontend from Angular to Next.js and TypeScript in collaboration with Node.js backend developers.

### Gmpc.xyz

Implemented Discord authentication for a Webflow website using vanilla JavaScript.

## EDUCATION

### Certificate in Front-End Development

Smart Academy · 2019
